

Rubric for grading group presentations for practical assignment 2 CS4205

Content

Research method / design

1-5	Unsystematic and/or no motivated use of research and design methodologies. Insufficient explanation.
6	Adequate use of research and design methodologies. Limited explanation.
7	Adequate use of research and design methodologies. Explained and justified.
8	Use of the right research and design methodologies. Well-explained and well justified.
9	Profound and critical use of research and design methodologies. Very clear and validated design.
10	Excellent demonstration of research and design methodologies.

Experimentation

1-5	Insufficient experiments done, or experiments are fundamentally flawed.
6	Experiments are minimally sufficient, but questionable whether they support the hypotheses to be tested.
7	Sufficient experiments performed, identifiably aimed at testing hypotheses.
8	Ample experiments performed, hypotheses statistically tested.
9	Experiments support drawing wider conclusions in larger settings such as invariance to different problem properties.
10	Vast amount of experiments performed that support the hypotheses to be tested as well as permit drawing conclusions about generalization over both problem properties and algorithm properties.

Interpretation of the results

1-5	Insufficient interpretation of results. Conclusions are unconnected to results.
6	Results treated as straightforward and unproblematic. Conclusions have minimal link with results.
7	Results treated as straightforward and unproblematic. Conclusions based on the results.
8	Methodical interpretation of results. Conclusions based on results in a clear way.
9	Methodical interpretation of results. Conclusions based on results in a clear way and extrapolated to wider context.
10	Detailed interpretation and verification of the results. The conclusions are based on the results in a clear way and are extrapolated to a wider context.

Presentation

1-5	No (proper) use of visual aids. Presentation is unstructured and chaotic.
6	Use of visual aids can be improved. Structure of presentation is poor.
7	Sufficient use of visual aids. Structure of presentation is reasonable but needs some improvement.
8	Good use of visual aids. Presentation has good structure, the essentials are separated from the ancillary.
9	Good use of visual aids. Presentation has very good structure, the essentials are clearly separated from the ancillary.
10	Perfect use of visual aids. Presentation has excellent structure, the essentials are very well separated from the ancillary.

Defense

1-5	Weak argumentation. Some questions got wrong answers.
6	Sufficient argumentation. A few questions did not get fully answered.
7	Satisfying argumentation. A few questions could benefit from more thoughtful or complete answers.
8	Satisfying argumentation. Well answered questions. Not always complete.
9	Sound argumentation. Well answered questions.
10	Strong argumentation. Perfectly answered questions: thoughtful and complete answers.
